

FOR SALE 3 HAWKER SIDDELEY DOMINIE T1

These aircraft were operated by the RAF as Navigational Trainers from birth until their retirement from the RAF in January 2011. After a UK tour the aircraft were released for sale and repositioned by the current owners to Kemble Airfield in June 2011.

Full logbooks are available with the aircraft, along with a wealth of ex Royal Air Force maintenance manuals and data.

Avionics are modern for an aircraft of this age due to continuous upgrades by the Royal Air Force throughout the life of the aircraft. Avionics are complete except the removal of the military transponder set. Assistance can be provided to enable installation of a civil transponder to replace the removed system.

The aircraft are available for inspection at Kemble Airfield (EGBP).
